Please Read Carefully Before Ordering

ORDER EARLY—It avoids disappointment by eliminating the chance of the variety selected being sold out. However, we do not discriminate, our prices are the same in the spring as in the fall. Our stock is always guaranteed, early or late, our large storage facilities permit this.

GUARANTEE—We ship only first quality stock which grows easily. It is clean, insect pest and disease free, healthy and true to name. Every bulb is fully guaranteed as such. Should any prove otherwise, we will gladly replace or refund your original purchase price.

SUBSTITUTION—We do not substitute unless directed to do so. However, a second choice is advisable if late in the season.

SIZE—Our bulb sizes are standard and liberal. No. 1—1½ inch and over; No. 2—1¼-1½ inches; No. 3—1-1¼ inches; No. 4—¾-1 inch; No. 5—½-¾ inch; No. 6—¼-½ inch.

Large—1¼ inches or more in diameter (Nos. 1 and 2).

Medium—¾ to 1¼ inches in diameter (Nos. 3 and 4).

Small—¼ to ¾ inch in diameter (Nos. 5 and 6).

QUANTITY—3 bulbs will be sold at the 10 rate; 25 at the 100 rate; 250 at the 1,000 rate.

SHIPMENTS—Weather conditions govern this largely. They usually start about March 15th. Unless otherwise directed.

DELIVERY—All orders amounting to \$1.00 or more will be delivered free to all parts reached by Parcel Post. Orders amounting to less than \$1.00 will add 15c for postage.

TERMS—Remittances should accompany your order, and should be made by check bank draft, American Express or Postal money order.

REFERENCE—For our standing, you may refer to:
The McDowell National Bank of Sharon, Pa.

PRICES—having a number prefix, as **2-.05**, means **2 for 5 cents**.
Prices as given in this catalog supersede all previous quotations.

SERVICE—As we are one of the largest producers of gladiolus, we offer the best, with courtesy, being fully appreciative of your patronage.

BEST FLOWERS—An exhibitor insists on a young bulb 1¼" or more in diameter. Bulbs over two years old usually do not produce the maximum of flower, and frequently are a source of trouble from disease.

BULB PERFORMANCE—For the maximum performance or exhibition spikes—**Large** (over 1¼") are much to be preferred. **Medium** (¾" to 1¼") bulbs are of blooming size but the flower is not as large and requiring more time to bloom. **Small** (¼" to ¾") bulbs will at times bloom late in the season and are noticeably smaller in size; **Bulblets** cannot be depended upon, either to bloom or for germination, many fail to grow under the very best of conditions.

"Your Assurance of Beautiful Flowers"

Our gladiolus bulbs are the best it is possible to produce. They are well grown, without pampering or irrigation, are scientifically harvested, cleaned and stored. They receive final inspection and preparation before delivery to you. They reflect this culture and care by giving you their beautiful bloom, the kind of bloom all flower lovers are looking for. Be sure to give them a trial—this season.

STEWART ORIGINATIONS AND INTRODUCTIONS FOR 1939

Mrs. K. T. Keller

We are happy indeed to name this flower for Mrs. K. T. Keller. Mr. Keller is president of the Chrysler Automobile Corporation. Both he and Mrs. Keller are lovers of flowers, and they are particularly fond of gladiolus, and with Mrs. Keller's favorite being yellow it is quite fitting to name this grand yellow for her.

This flower is much larger than any of the yellows, and of the wide open type. It is an exquisite shade of perfectly clear soft yellow, blending to a deeper throat without any markings whatsoever, giving the entire flower a depth and richness enhancing the beauty of this stately variety. There are six or more of these large flowers open at one time on a tall strong spike of twenty buds. The plant is very vigorous, a real improvement in the yellows.

MRS. K. T. KELLER PRICES—Any size Bulb \$10.00 each; Bulblets \$5.00 for 4.

Eileen Friedell

In recent years there has been an increased popularity in white flowers. Eileen Friedell's interest, and love for white flowers, and more especially the white gladiolus antedates by several years this more recent demand; I feel that it is most appropriate to name this beautiful white for her.

While these flowers are a perfectly clear white they are soft, a touch of refinement is given by the soft ruby throat. The entire throat has a cast of soft color, giving richness and depth to this gorgeous flower. The plant is vigorous and strong, with tall erect spikes holding five or more of these flowers open at one time with eighteen or more buds.

EILEEN FRIEDEL PRICES—Any size Bulb, \$10.00 each; Bulblets, \$5.00 for 4.

Mrs. Julia P. Buhl

Here we offer something very different. A large flower and a tall heavy growing plant that is vigorous, something new in the violet color class. The large flower is a rich violet with a blue cast at the outer edges of the petals, and blends gradually to a soft cream throat which is overlaid with a delicate blue violet feather. It will hold four or more open at a time, and is very well liked wherever shown.

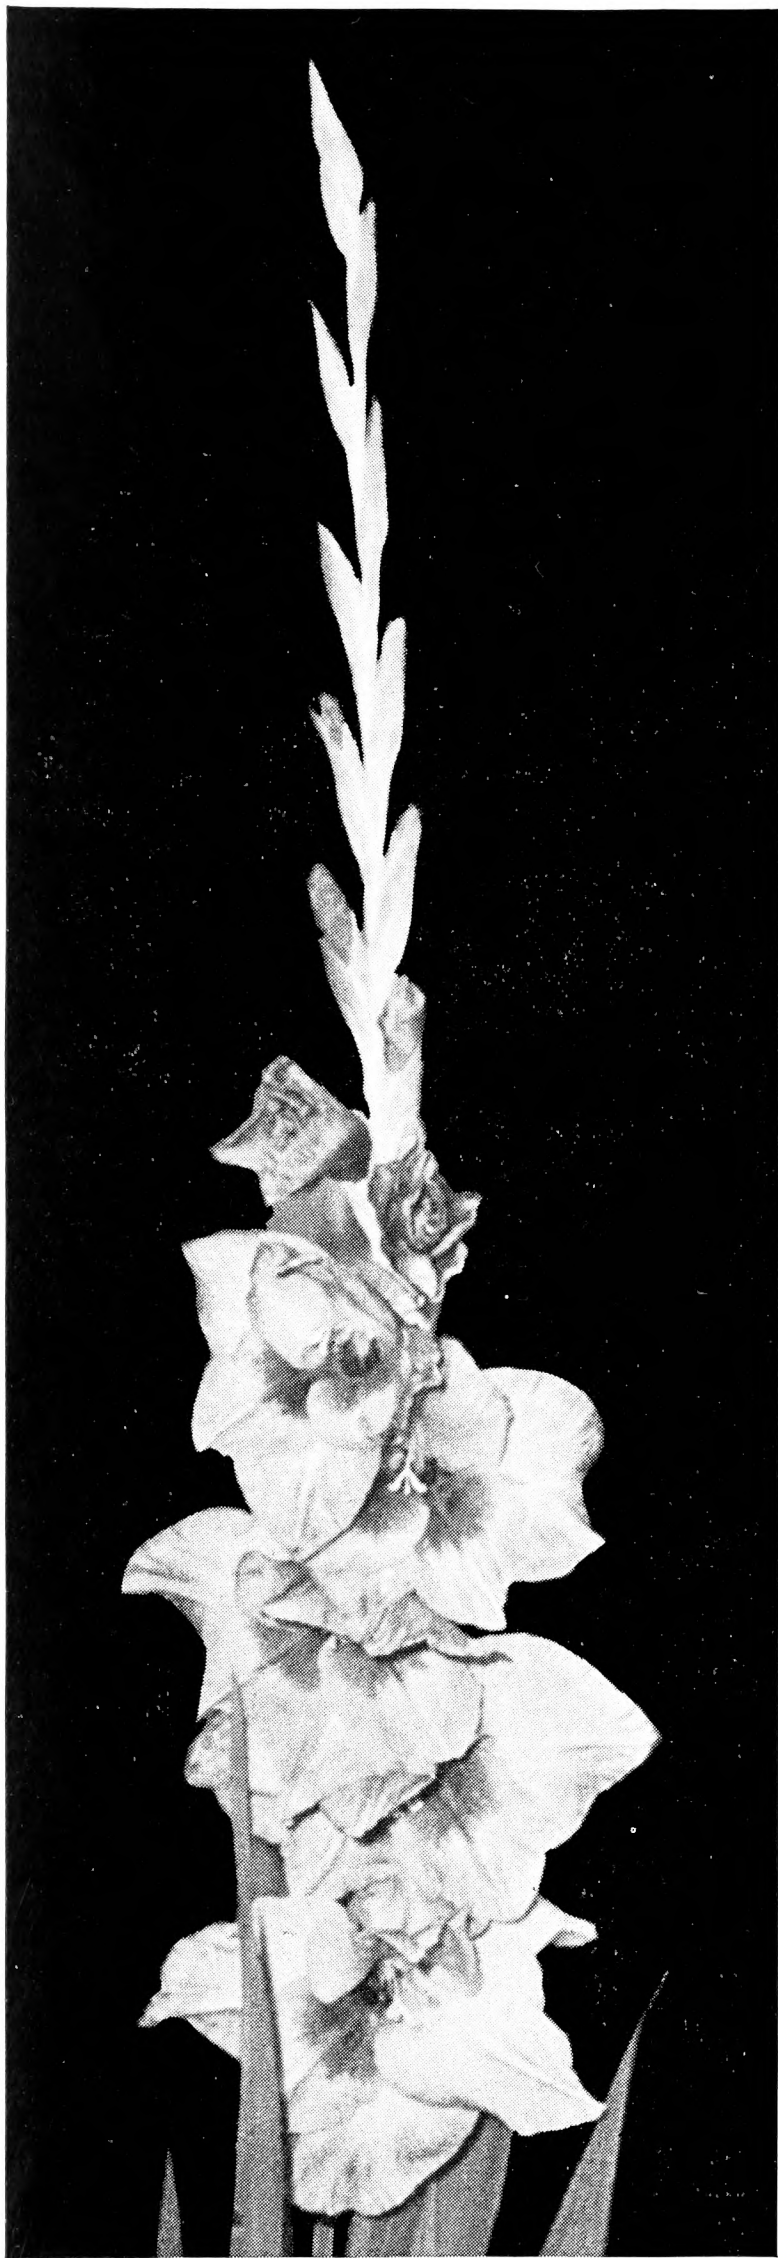

It is my privilege to name this flower for one who loved and has given so liberally for the children of Sharon, Pa. Her philanthropic work will ever be on the tongues of Sharonites. A real lover of flowers which was so freely expressed on her numerous visits to our gardens.

MRS. JULIA P. BUHL PRICES—Any size Bulb, \$10.00 ea.; Bulblets, \$5.00 for 4.

Mrs. Caroline Werner Gannett

(Chamberlin-Stewart)

This 1939 introduction is, without exception, the largest gladiolus I have ever seen. Unlike other so-called mammoths this variety has the ideal spike; strong, always erect with its flowers perfectly arranged, and easily seven or more open; I have seen ten open at one time, all in fine condition. The round flowers are of medium rose with a slight cast of salmon; the large cherry blotch is soft and blends nicely. The entire flower has a richness and depth of color with perfectly firm and wonderful substance. Not a sign of softness or looseness.

Mrs. Caroline Werner Gannett

The picture at the left was made at my suggestion in late September, being grown from a small bulb, and photographed in the garden. The bottom floret measures eight inches across (I have seen them larger). You will note too that the other florets are proportionately large. The entire plant is perfectly proportioned, tall, strong, and vigorous, holding its mammoth flowers perfectly.

Caroline Werner Gannett was first shown at the Empire State show at Rochester, N. Y., 1937. Here as a seedling it was grand champion, and an easy winner in competition with the blue ribbon winners of every class in the show, and that included all of our best varieties, very well grown too.

It stole the show, and was conceded by all who saw it as the biggest flower, and the greatest advancement made in gladiolus in many, many years, and this decision was shared by most of the gladiolus notables from the Middle West and Eastern states.

This variety coming from Wurtembergia X Picardy, and with its exceptionally fine proportions, and habits for a mammoth variety will certainly be used extensively as a parent.

After seeing Caroline Warner Gannett I promptly got in touch with Mr. Chamberlain, the originator to know whether or not he wanted to sell the stock. I found he had much too small an amount of stock for introduction in 1938, but have persuaded him to introduce it this year, 1939. I have bought one-half the stock. The stock is still very limited, and only a limited number will be released.

MRS. CAROLINE WERNER
GANNETT PRICES—Any size
Bulb, \$100.00. Bulb!ets, \$10.00
for one.

Acona

A very valuable early cut flower variety. This clear cream is ruffled, holding five or more open. The flower is not as large as we would like it (about 3½ to 4 inches), the spike is better than medium length. A good strong grower, always erect and straight, a good producer.

Coming as it does well before others in its color range it is always in demand. A really profitable variety for the commercial grower and the best early cream for the home garden.

ACONA PRICES—Any size Bulb, \$5.00 each; Bulblets, \$1.00 for 2.

Acona is a 1939 introduction; unable to get it on other pages.

OUR 1938 INTRODUCTIONS

Mrs. Walter P. Chrysler

(Illustration page 3)

This flower is distinctly different, with its curls and ruffles; we have seen nothing to compare to the individuality this flower possesses. The large flowers are free, yet in perfect symmetry. Four or more of these light rose pink flowers are open at one time, blending nicely to a bright throat; a pronounced deep rose line marks the center of each petal. This beautiful blending of color combined with the distinctive curls and ruffles greatly enhances the beauty of this new novelty. A variety which will soon be grown by all lovers of gladiolus, it is excellent for the home garden, and is equally desirable as a cut flower, possessing the best of substance. A free producer.

PRICES—Large Bulbs, 1-\$4.00; 10-\$32.00; Med., 1-\$3.00; 10-\$24.00; Small, 1-\$2.00; 10-\$16.00; Bulblets, 1-\$.40; 10-\$3.50.

Andree Clark

(Illustration Front Cover)

The variety was awarded a blue ribbon when shown as a seedling. The flowers are a perfectly clear light rose pink, without markings, occasionally a slight overlay. The spikes are tall and upright, carrying perfectly six or more of these lovely large flowers open at one time. It is certain to become a very popular and lasting variety with its strong habits of growth and ease of production. Florists repeatedly ask for it now.

PRICES—Large Bulbs, 1-\$4.00; 10-\$32.00. Med., 1-\$3.00; 10-\$24.00. Small, 1-\$2.00; 10-\$16.00. Bulblets, 1-\$.40; 10-\$3.50.

La Grace

Here we offer charm, in a medium size flower and plant, hardly possible in the large and glamorous types. The flower is an exquisite light La France pink with vivid thumb nail throat marks of bright pink, all combining to enhance the sweetness of this refined variety. There are several of these flowers open at one time on a nice slender erect spike. A very popular variety.

PRICES—Large Bulbs, 1-\$2.50; 10-\$20.00. Med., 1-\$1.50; 10-\$12.00. Small, 1-\$1.00; 10-\$8.00. Bulblets, 1-\$1.25; 10-\$2.00.

Persian Orange

(Illustration page 28)

The very finest of the oranges, a perfectly smooth and bright true Persian orange, a shade that is brand new. The clear, sharp median lines add a chiqueness to this variety, making it one of our very popular varieties. The flowers are of good size and well spaced, six or more open on an always erect spike. A good producer.

PRICES—Large Bulbs, 1-\$3.00; 10-\$24.00. Med., 1-\$2.00; 10-\$16.00. Small, 1-\$1.00; 10-\$8.00. Bulblets, 1-\$.30; 10-\$2.00.

Valentine

All that the name implies, a real beauty in a bright clear red with large white throat. Of strong vigorous growth, it holds six or more open at a time, well placed on an always straight tall spike. A striking flower, well liked by all.

PRICES—Large Bulbs, 1-\$3.00; 10-\$27.00; Med., 1-\$2.00; 10-\$18.00. Small, 1-\$1.00; 10-\$9.00. Bulblets, 1-\$.30; 10-\$2.60.

Mary Damaris

(Illustration page 3)

This is by far the most beautiful shade of soft yellow I have ever seen in gladiolus, perfectly clear with white stamens. The placement is ideal and holds seven or more large flowers open at one time. It consistently produces 40-inch spikes even from small bulbs that are always erect and strong. A free and vigorous growing variety, a good producer. This variety repeatedly wins in its color class wherever shown. The illustration on page 3 was made from a photo of the three winning spikes at the big Boston Show 1938, where it had previously won.

Mary Damaris is the most satisfactory cut flower yellow we have. It opens perfectly after shipping. We need to work up a larger stock of this variety, and offer only large bulbs this year, at no reduction in price from last year.

PRICES—Large Bulbs (only), \$1.00 each.

MARY DAMARIS as it is grown and artistically arranged
in England by Major Churcher.

Flash

(Hedgecock)

The color quality in this flower exceeds that of any scarlet I know. It is rich and beautiful, a decided advance in this class, and should supercede most of those now enjoying popularity as a cut flower.

The growing habits of this beauty are ideal, a vigorous healthy grower of tall strong spikes, always erect, and carries five or more flowers open easily. I was bothered some because the first flower occasionally is out of place, but that seems to be its only fault. An excellent cut flower variety, and received by the florists greedily. I expect this will be in big demand.

PRICES—Large Bulbs, 1-\$.80; 10-\$7.20. Med., 1-\$.50; 10-\$4.50. Small 1-\$.30; 10-\$2.70. Bulblets, 1-\$.10; 10-\$.90.

Lindsay

(Patterson)

This variety has proven itself many times as being superior to all in its color class. It repeatedly wins in the Canadian Gladiolus Society shows. The color is buff-orange, with eight or more large flowers open at a time with 18 or more buds. The spike is tall, erect and holds the perfectly placed flowers easily.

A seedling of Rattray X Apricot Glow, its habit closely follow that of the latter parent except that the flowers are larger, and more open, and it does not increase as fast.

For us it has been an excellent cut flower variety. It possesses more than ordinary ability to withstand the warm days.

PRICES—Large Bulbs, 1-\$.80; 10-\$7.20. Med., 1-\$.50; 10-\$4.50. Small, 1-\$.30; 10-\$2.70. Bulblets, 1-\$.10; 10-\$.90.

OUR EARLIER INTRODUCTIONS

Alfred M. Landon

(Illustration page 28)

Coming as it does well before the rush of summer bloom, makes this a much sought after flower by the florist. We are still unable to meet the demand for it. This variety with "Village Queen," and "Jessica" make a trio of top price early cut flowers that are welcomed by the florists both wholesale and retail. They make a grand showing for the home before others arrive.

"Landon" is a smooth, soft scarlet flower of good size with 8 or more open on a really tall tough spike that is always erect. A vigorous grower and good producer.

This variety is always in demand so get your start early.

PRICES—See page 13.

Alice Herriott

The warmth of this beauty with its blending of rich cherry-rose with just a cast of blue to the upper throat make it one of the most beautiful flowers we have. A tall, strong spike with eight of these beauties open at one time makes a truly impressive picture. A flower you will like in your garden.

PRICES—See page 13.

Elsie Adele

Elsie Adele

A perfectly smooth, and clear blue La France pink, a dignified refined beauty. The spikes are tall, and rigid like, with five or more large flowers open at a time, with 16 and more buds to the spike. This too is a "second early," and a very valuable cut flower judging from testimonial letters.

PRICES—See page 16.

Blue Bizarre

A real novelty, and the recipient of many favorable comments wherever shown. It has unusual color, being a light violet blue with varying overlays of deeper violet blues, some of the flowers being comparatively clear. Flowers better than medium in size on a nice strong spike make it a really desirable addition to the garden. It is used a great deal as a cut flower, too.

PRICES—See page 14.

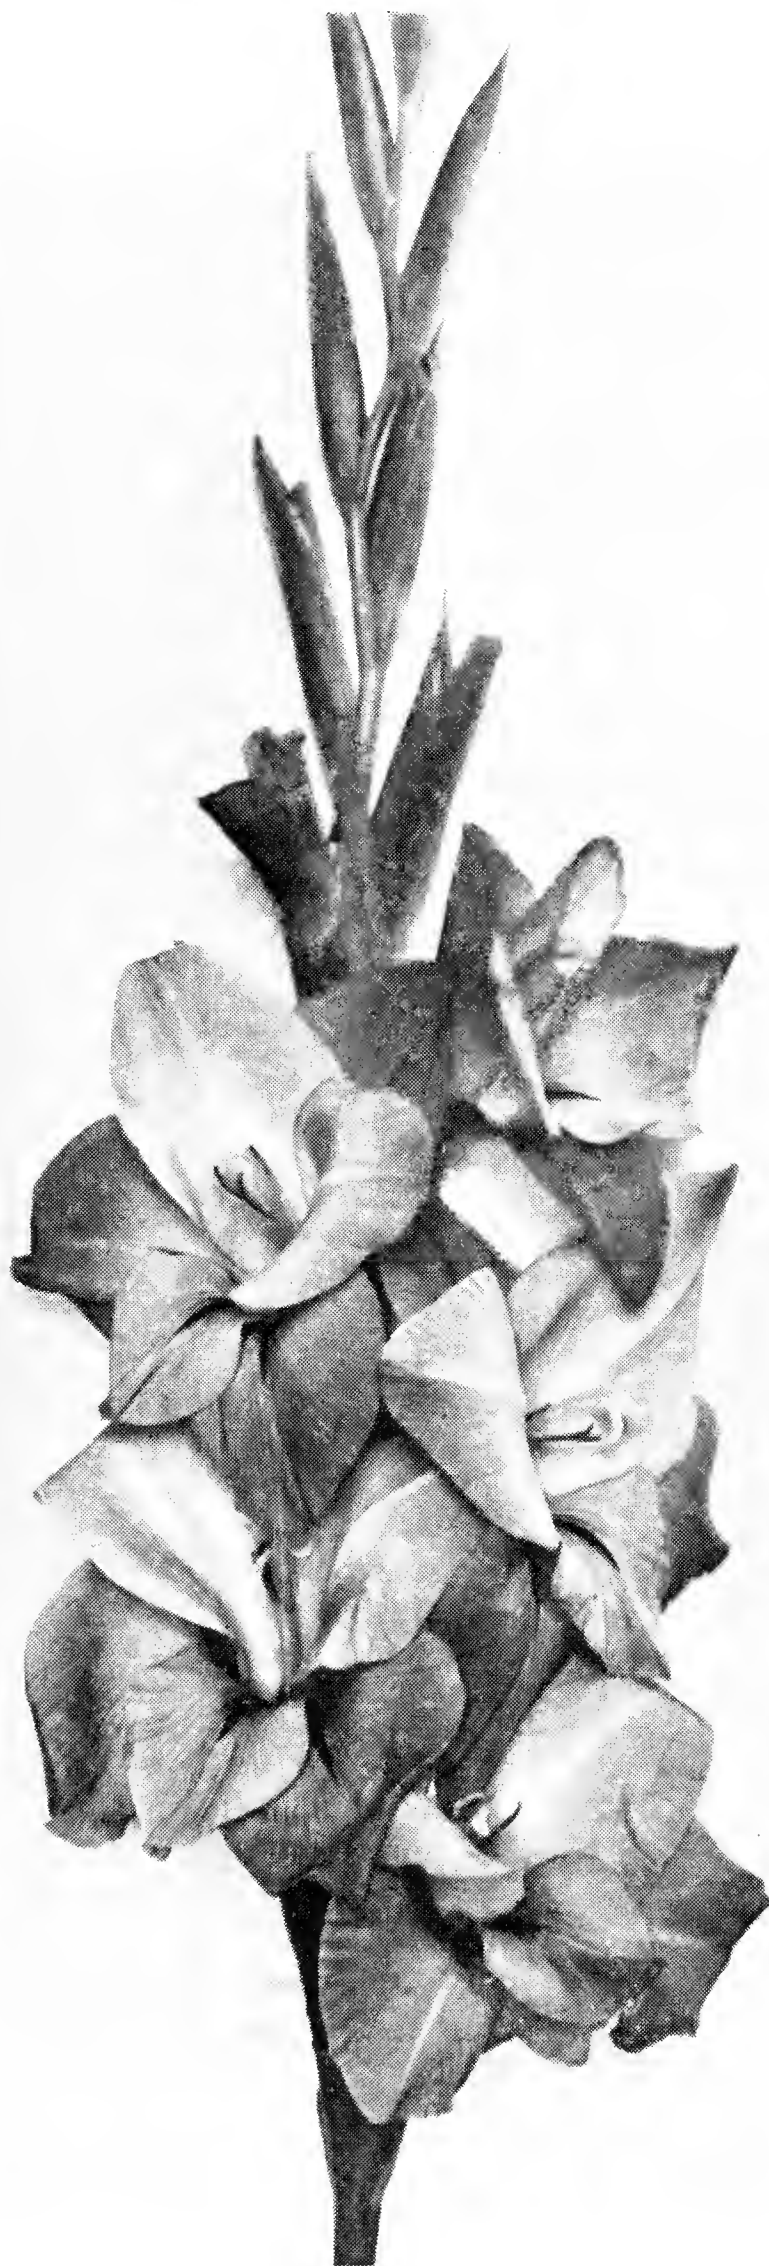

Colfax

This is a truly beautiful shade of velvety rich deep violet, the flowers are better than medium in size, and having exceptionally heavy texture. There are four or more open on a nice strong spike, and always straight.

The spike is better than medium tall, and well proportioned with 16 or more buds well spaced. This variety has not sold as fast as most of mine as it has not been shown as frequently. It is nevertheless a glorious shade of violet, and will go just as soon as it is better distributed.

PRICES—See page 15.

Jessica Dragonette

Jessica Dragonette

This flower is an exquisite perfectly clear rose pink, blending to a lighter throat. The entire flower which is of better than medium size has a blue sheen, giving it real beauty. A vigorous growing variety of good height with four or more flowers open. A good producer, and much to be desired as an early cut flower.

PRICES—See page 18.

Margaret Stewart

One of our most popular varieties, and a real beauty. Not a glamorous but a rich and beautiful red-red rose in color, a shade not to be found in others. With the very best of growing habits it consistently produces tall straight spikes, holding five or more good sized flowers open at a time. A grand variety for your home garden. Then, too, the florists use it freely which indicates its correct shade of rose-red.

PRICES—See page 20.

Maj. Edward Bowes

(Illus. page 23)

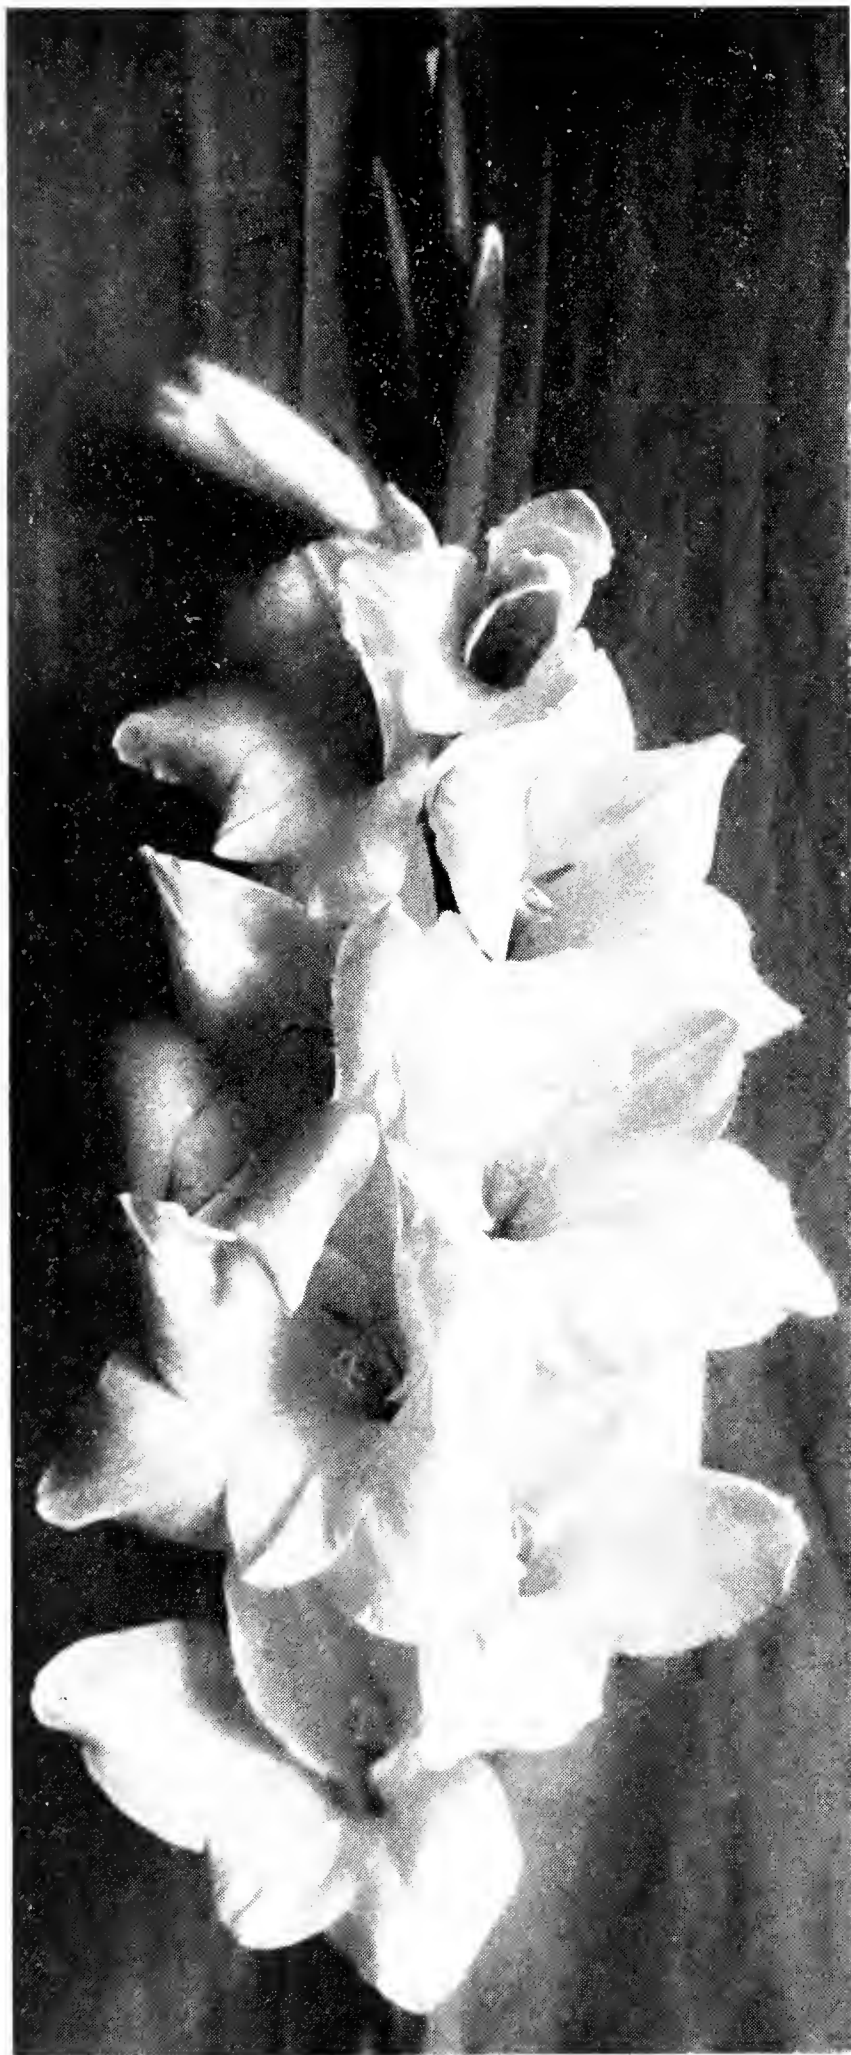

This is a massive plant, tall heavy spikes that carry the long flower spike perfectly. It is not unusual to have more than twenty buds to the spike, and it easily holds eight or more flowers open at a time.

The flowers are large, a bittersweet pink with occasional overlay of a slightly deeper tone. The small neat pinard yellow throat adds much to the attractiveness of this outstanding variety. An excellent exhibition variety, with wonderful substance.

I fully expect the "Major" to become one of our most popular varieties. It already has a big start in that direction.

PRICES—See page 20.

Success

Success

This perfectly pure white is positively the most arresting variety we have grown. We shipped our flowers to the big Boston show by express (650 miles). There were three newer varieties of white in our display—"Success" was the one singled out every time. They withstood the abuse of the shipment, opened perfectly, and held up perfectly throughout the show.

Tall, strong, stately, pure white. Very large flowers, and five or more open at a time.

Smaller quantities were shipped even greater distances, placed on the tables in competition with their local grown varieties, and still won. The future of this variety is extremely bright.

PRICES—See page 24.

Totem

We have never grown a variety that produced better spikes than this one does, and the placement is never faulty. One of the very best, if not the best in its color.

The flowers are large, and round, with five of them open in perfect placement on a tall, erect spike. An outstanding variety in the garden.

The color is correct as a cut flower—a brilliant clear salmon scarlet. This variety always brings top prices. It is a perfect shipper, opening well expanded flowers. We have reports from Florida that it is the best by far in its color class they have ever grown, and shipped equally well. Here we offer a tried and true cut flower variety.

PRICES—See page 25.

Phyllis McQuiston

(Illustration page 23)

A gorgeous pure pink that blends as only nature can do it to a perfectly soft light throat.

The most popular of All the Pure Pinks grown today, and very, very close to the top of all others. It grows freely, gives tall, strong spikes that are always straight. It carries 18 or more buds, and holds five or more open at one time with ease.

This variety has not arrived at its present enviable position among growers of gladiolus, both amateur and commercial, over night. It has by its own performance for others proven itself unequalled in all points that go to make up a beautiful flower for the home garden, and a desirable one to grow for profit.

It will be grown for many years to come because of this, and in even greater quantities than is being grown now. We have enjoyed a complete sell out every year.

"Phyllis" was our first introduction. It has been and will continue to be a profitable variety to grow. There are several others of our introduction which will "go places." Join us—get your start now; it will be both enjoyable and profitable.

Blue Ribbons

Our varieties have been successful in the extreme this past season, so much so that it would be necessary for me to use an excess of superlatives and space in the description of every one of them if I were to even approach the grand testimonials we have received. Some of them are brief, others dwell at length on the wonderful performance, and of the blue ribbons they have won with our varieties.

I deeply appreciate every letter received and assure you we will continue to make every effort possible to please you.

THE SMALL FLOWERED GLADIOLUS

Repeated requests for the smaller varieties of gladiolus has prompted us to list a most comprehensive list of them this year. The flowers vary in size from one and one-half inches to three inches; some grow fairly tall while others grow only twenty inches high. They have come into greater demand as they are unequalled for table decoration in the home and for low vases, which continue to increase in popularity. These smaller varieties are not all Primulinus, and should not be confused with this old type. The varieties we offer are all the very best in their respective colors which extend through the full gamut of colors. The large varieties have, and in addition include many pastel shades as well as several very attractive novelties. All are very beautiful and quite worthy of your consideration for the home and garden.

The list follows. Description and prices appear in their respective alphabetical order in the catalog and are marked (S.D.) small decorative.

Two Small Flowered Assortments

No. 8—LARGE BULBS—There are several types and a wide color range in these small graceful gladiolus. There will be twenty different varieties in this excellent assortment, all the very nicest. 100 bulbs, \$3.00; 50 bulbs, \$1.50; 30 bulbs, \$1.00. FREE with above assortment, one or more of our new higher priced varieties, labeled.

No. 9—MEDIUM BULBS—Same varieties as No. 8 assortment. 100 bulbs, \$2.00; 50 bulbs, \$1.20.

Labelled Assortments

No. 10—LARGE BULBS—This assortment contains 6 different varieties (our selection); each variety will be bagged and labeled—all are real beauties. 5 bulbs of each: White, Yellow, Lavender, Light Pink, Deep Pink and Red. A total of 30 bulbs\$1.00

FREE with above, one of our new higher priced varieties, labeled.

No. 11—LARGE BULBS—The best popular varieties are included in this assortment. 10 different varieties (our selection).

10 bulbs of each: White, Cream, Cream-Pink, Yellow, Light-Pink, Medium-Pink, Deep-Pink, Lavender, Scarlet and Blue. Total of 100 bulbs.....\$3.00

FREE with above, one or more of our new higher priced varieties, labeled.

No. 12—LARGE BULBS—A quality assortment at a very low price, with a wide range of colors. 24 different varieties all labeled. Total of 75 bulbs\$3.00

2 Albatross	4 Col. Chas. Lindberg	3 Mrs. L. Douglas
2 Antione	2 Dr. Durr	4 Our Selection
4 Apricot Glow	4 Early Melody	3 Phyllis McQuiston
4 Bagdad	2 King Arthur	4 Picardy
4 Betty Nuthall	2 Lucifer	2 Sunshine Girl
2 Bill Sowden	4 Marg. Fulton	3 Totem
2 Blue Danube	4 Marion Louise	3 Village Queen
4 Classic	2 Marmora	3 W. H. Phipps

No. 13—LARGE BULBS—Another quality assortment, varieties all differ from those in Assortment No. 12. 24 different varieties, all labeled. Total, 75 bulbs \$3.00

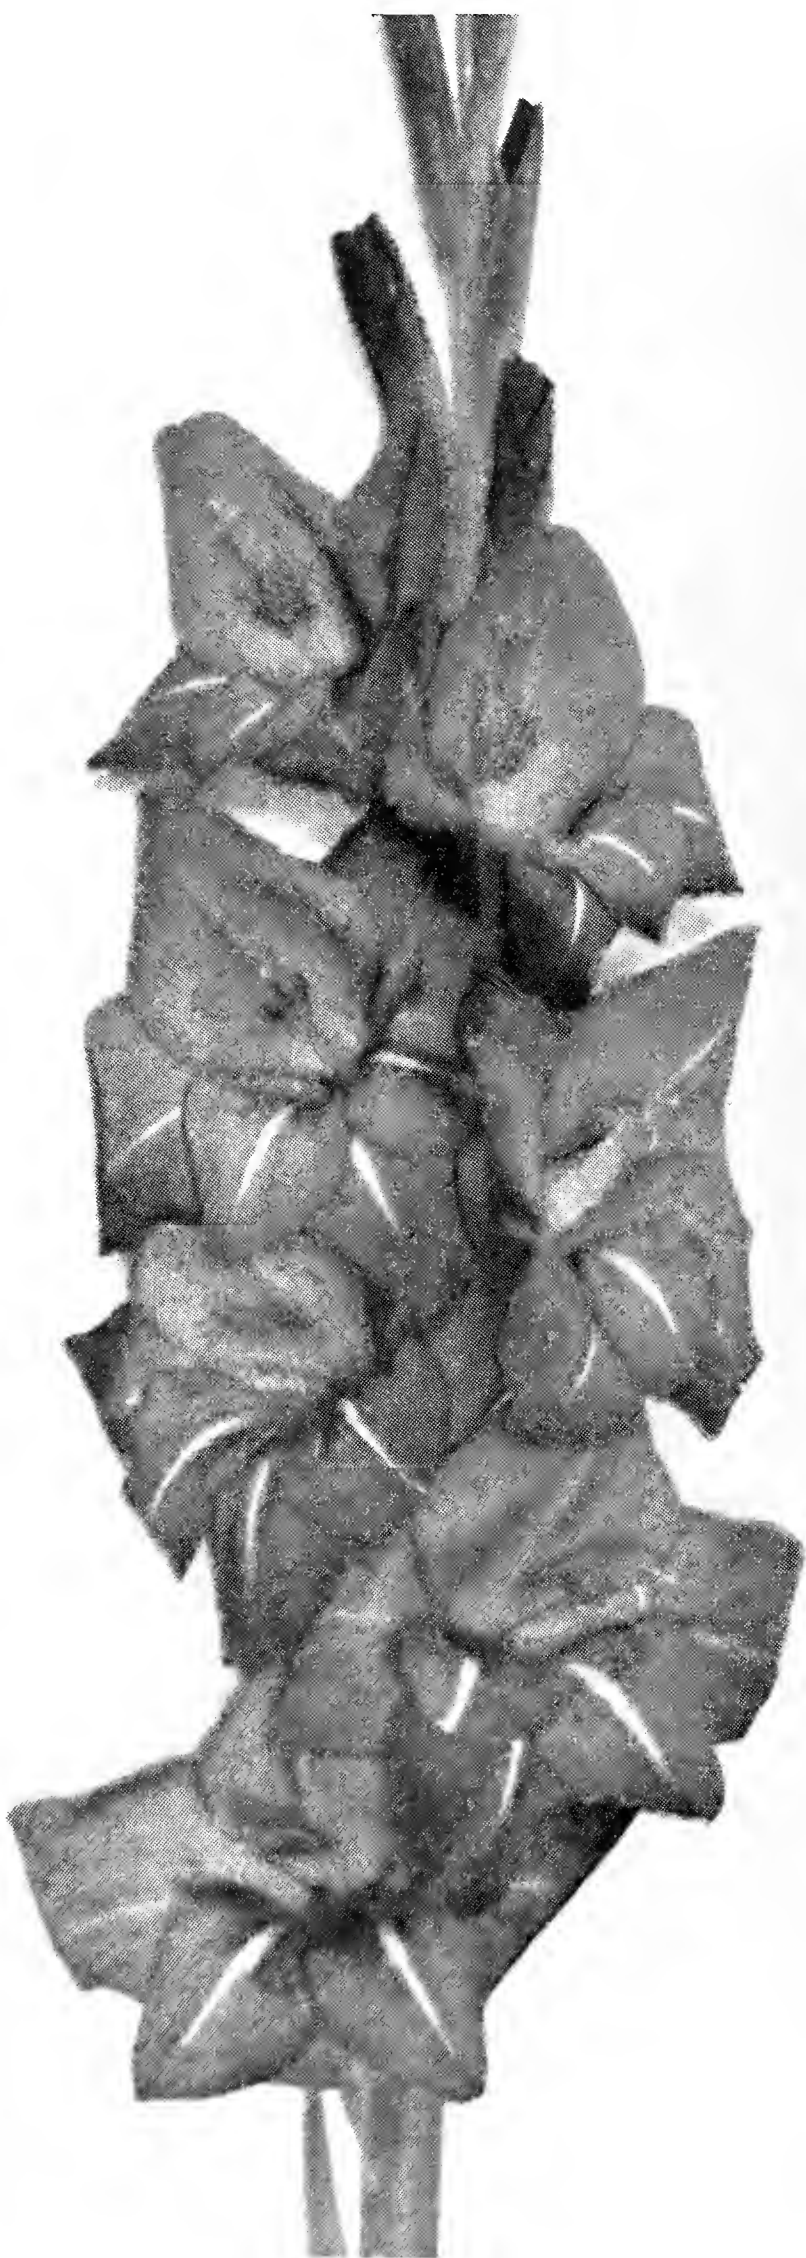

2 Charles Dickens	2 Grand Slam	2 Morocco
4 Com. Koehl	4 Janet	4 Mr. Cuthbertson
2 Coronation	4 Lav. Delight	2 Pelegrina
4 Debonair	2 Maid Orleans	2 Pirate
4 Duna	2 Marion Louise	4 Pinnacle
2 Early Peach	4 Mauve Magic	4 Senorita
2 Edith Robson	4 Mild. Louise	2 Trevonian
4 Fata Morgana	2 Minuet	4 Wasaga

No. 14—LARGE BULBS—An excellent grouping of the newer varieties at a big saving. 18 different varieties. Total of 54 bulbs\$6.50

2 Autumn Glory	2 Gen. Kuroki	2 Paradise
4 Avignon	4 Ivernia	2 Prairie Gold
4 Benedict	4 Jessica Dragonette	2 Recovery
4 Elsie Adele	2 La Fiesta	4 Red Ruffles
2 Eulalie	4 Major Bowes	2 Silversheen
2 Ev. Stinton	2 Mary Elizabeth	4 Tawhaki

FREE with No. 13 or No. 14 one or more of our very new higher priced varieties.

The "ALL-WEATHER" Garden Marker

(PATENTED)

MAKES GARDENS NEATER and EASIER TO CARE FOR

THE ALL-WEATHER MARKER
As it appears from a standing position.

Stake, 15 inches long; Label, $\frac{3}{4} \times 4\frac{1}{4}$ inches.

LABEL your flowers, plants and shrubs without fear of losing their names, improve the appearance of your garden and make working in your garden a real joy.

EASY to use, just write or print the name with the "All Weather" pencil, the longer it is exposed to the weather the more resistant it becomes.

JET BLACK is the "All Weather" pencil. Ordinary pencils can be used but are not as legible.

LEGIBLE from any standing position the label being face up, this feature makes them more convenient and enjoyable.

CLEAN—they are never spattered with mud or dirt, you can have them any distance from the ground.

PERMANENT—they can remain in the ground throughout the year for many years and be perfectly legible.

ANNUAL—remove them and keep them with the stock in storage. They lay flat, are not unwieldy. The name is quickly removed with a polish, ready to be used again.

USE wherever a plant marker is needed—for Roses, Iris, Peonies, Delphinium, Gladiolus, Evergreens and many others.

INDESTRUCTIBLE—practically so. They will not break. The materials used are of the highest quality.

PRACTICAL — thoroughly so, there are many thousands now in use throughout the U. S.

PATENTED, the original "All Weather" Garden marker, returning to this catalog by popular suggestion.

TESTIMONIALS — many grand ones, on their practical use, appearance, service and economy.

Priced Per 12, \$1.60; 25, \$3.00; 100, \$10.00.

PREPAID DELIVERY

With each order for 25 or more All-Weather Garden Markers, one All-Weather Pencil will be included without charge.

Additional All-Weather Pencils at 15c each.

The All-Weather Garden Marker—The Most Popular Marker Today.

CARE AND CULTURE

THE GLADIOLUS can be successfully grown in practically any soil. They are easily grown and respond wonderfully to a little attention, such as timely watering and cultivation. They will adapt themselves to most any garden and will be found doing much better than most flowers with an equal amount of effort by the grower, be they amateur or professional.

THE PACKAGE when received should be opened at once to admit air directly on bulbs—store in cool, dry and frost-proof place until planting time.

SOIL and LOCATION—Any good garden soil is very satisfactory; the soil should not be worked when wet, and should be kept pliable at all times during the growing season. They will not do their best in too much shade. They enjoy being planted in rows or in beds; they are valuable in the landscape, putting clumps of all one color or mixed at suitable points for the desired effect. The ground should be well drained for best results.

DISINFECTING—Precautionary measures guarding against insect pests and bulb troubles are very effective and most economical. The garden should be cleaned and the old tops of gladiolus as well as the tops of other plants and other refuse should be raked up and burned. The storage room should be clean and disinfected as well as the bulb containers before using them to store bulbs over winter. Disinfecting all bulbs before planting is an easy task and is advisable as it will practically eliminate any disease or insect pest. We offer but one method: this accomplishes all in one operation; use at the rate of one ounce of Bichloride of Mercury (poison) to 7 gallons water (B. of M. is more soluble in warm water). soak from 8 to 10 hours, the night before planting, (not necessary to remove husks); a simple procedure is to place bulbs in salt or sugar bags, tie strong string around top of bag, other end of string carrying the variety name on it, drop in solution, a stick will punch them under—after soaking, hang up by string to dry, or they may be planted wet. Use non-metallic container for the B. of M.

PLANTING—Have soil loose; make trench or hole deep enough so that bulbs can be covered with three inches of dirt, (sandy soil, five inches); plant bulbs three inches apart in the row. If fertilizer is used at planting time, keep at least two inches from bulb, by covering bulb with dirt before adding the fertilizer.

SPRAYING and THRIP—Thrip is a very small insect 1/16 inch, and the cause of most all gladiolus failures. It causes the plant to turn brown, and does not permit the development of a good flower. While this insect is no longer serious, preventative measures must be used. **Soak all bulbs** before planting, with bichloride of mercury as directed above. Thrip survive the winter in your storage, so take the bulbs to the garden in the container you soaked them in. Everything taken from the storage should be clean. Inspect the plants closely when small, start when they are 2" high—if thrip is detected spray daily until they are destroyed, then spray once a week, or as your case requires. They must all be destroyed before flower spike starts. Spray in the early evening, this gives a minimum of evaporation and permits the spray to spread more thoroughly. The best and most economical spray is Rototox—write them—The Rototox Co., 81 East Yale St., East Williston, N. Y. They will send you pamphlet on how to use Rototox, and prices.

WATER and CULTIVATION—Water thoroughly so that it will soak down to the bulb, at least once a week, but count a good rain as one; cultivate thoroughly next day if not sticky.

THE FLOWER—If you wish to cut the flower do it when the first flower opens wide. To get a nice spike with it, slide the knife down close to spike on one side stopping six to eight inches from ground, then slide it down the opposite side giving knife a twist at the bottom to remove spike with flowers; this operation cuts leaves from spike but they remain on the plant, which is essential to properly mature the bulb.

HARVESTING—Bulbs should be ready to dig three to six weeks after blooming, or dig when foliage starts to turn brown. Loosen bulb with fork or other tool and bulb will lift out by the top—shake dirt off—cut tops off close to bulb, let bulb fall in clean container (three inches deep), pile up tops for burning. Let bulbs cure three to six weeks in a dry, airy, frost-proof place, stir occasionally for thorough drying—they must be dry. When ready, the old root should snap off easily, leaving bulb clean; now store away for winter in containers (boxes or bags) not over four inches deep, in a cool, dry, frost-proof place.

WHOLESALE PRICE LIST

PRICES ARE F.O.B. BURG HILL, OHIO

PRICED PER 100—The 1,000 rate is 8 times the 100 rate. Not less than 25 same variety and size at the 100 rate. 250 at the 1,000 rate. Bulblets—1 pt. at quart rate.

Quotations will be made on quantities and varieties not included in this list.

The New England Gladiolus Society

The annual, and quarterly publications of this society are the best to be had on the Gladiolus. Offering a wealth of up to date articles.

Select the type of membership you prefer and send to Albin K. Parker, secretary, Norwood, Mass.

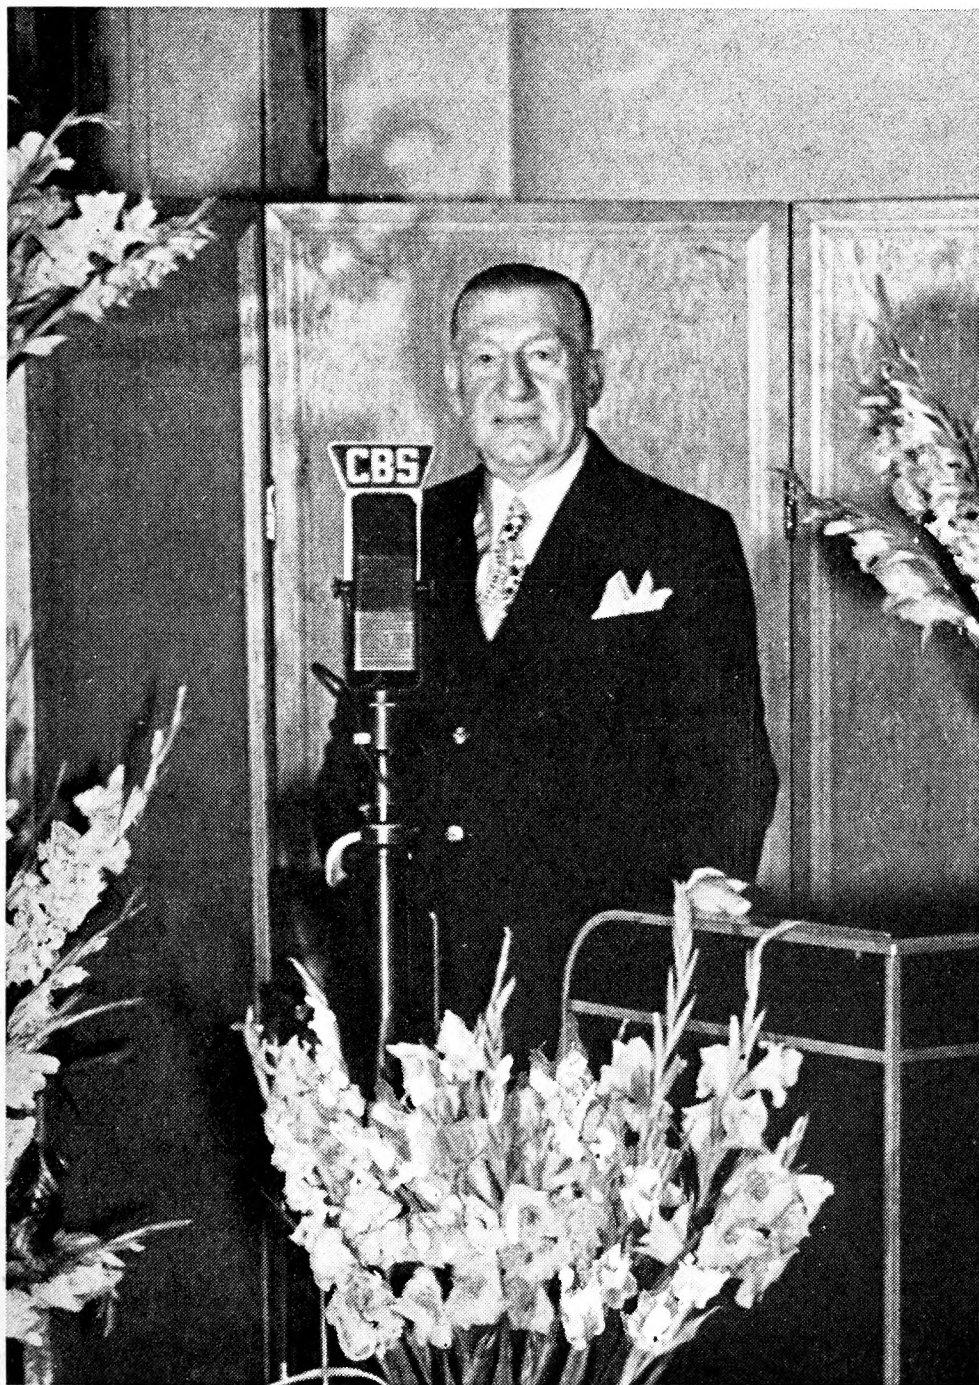

Regular Member—\$1.00; Gives full benefits of the Society, and a copy of Regular Edition of, "The Gladiolus 1939."

Supplement Member—\$2.00, "The Gladiolus 1939" in flexible binding, and in addition the April, July and October Supplements.

Life Member—\$25.00—Benefits of supplement membership for life.

Sustaining Member—\$5.00, is Supplement Membership including a direct contribution to the N.E.G.S. reserves.

Major Edward Bowes and His Amateur Hour and Stewart Gladiolus

This close up of the Major was taken in August 1938. The occasion was another grand display of our gladiolus on the stage, at his regular broadcast in New York City, sponsored by the Chrysler Automobile Corporation.

The Major being a real lover of gladiolus we sent an abundance of his favorites, whites, and his namesake, direct from our gardens. The setting, and the occasion created an atmosphere all very much to his liking.

MAJOR EDWARD BOWES

Carson R. Stewart
